Subject: Two-Factor Authentication for MyFIU

The Division of Information Technology, as part of its ongoing cybersecurity strategy, will be offering Two-Factor Authentication to the FIU community beginning July 20th. Faculty, staff, and students will be able to enroll in Two-Factor once they log in to MyFIU.

Two-Factor Authentication will increase security measures on your account by requiring two steps to log in. We strongly suggest that you opt-in to this important service, as it adds another layer of protection to your account.

More information about Two-Factor Authentication and how it works is available at twofactor.fiu.edu.

FIU Login – Two-Factor
